Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 3, 5, 7-10, 12, 14, 16, 18, drawn to a maintenance system for performance or efficiency evaluation, classified in class 702, subclass 184.
 - II. Claims 2, 4, 6, 11, 13, 15, 17, 19, drawn to a system of electronic shopping by remote ordering, classified in class 705, subclass 26.
 - III. Claims 20, 21, drawn to a system of automatic or integral protection for an inverter, classified in class 363, subclass 55.
2. Inventions I, II, III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because inventions II and III (example, purchase request and parameter setting) do not require the particulars of the invention I. The subcombination has separate utility such as remote ordering and remote parameters setting.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2645

3. A telephone call was made to Alan Schiavelli to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
